PROFILE

AI/ML Engineer with hands-on experience shipping end-to-end AI-powered products, from multi-tenant AI voice agents and Vision AI mobile apps to autonomous automation engines. Strong Machine Learning and Deep Learning fundamentals, with practical experience training and deploying custom ML models, RAG pipelines, LLM integration, and fine-tuning foundation models – combined with full-stack (React/Next.js, Flutter, Node.js) and UI/UX ownership from design to deployment. Pursuing a Bachelor's degree in Artificial Intelligence (top 5% of batch).

EDUCATION

The University of Faisalabad

Bachelor of Engineering in Artificial Intelligence – Top 5% of batch

2024 – Present

Faisalabad, Pakistan

Concordia College

Intermediate in Computer Science

2020 – 2022

Faisalabad, Pakistan

Certification: Google User Experience Design – Feb 2023

SKILLS & TECHNOLOGIES

Languages: Python, JavaScript, Java, Dart

AI / ML / GenAI: Machine Learning, Deep Learning, LangChain, PyTorch, HuggingFace, Scikit-learn, RAG, Fine-Tuning Foundation Models, Agentic Workflows, Prompt Engineering, Gemini API, Claude API

Voice AI & NLP: Twilio, Deepgram, ElevenLabs, Whisper, XTTS, Coqui TTS, Transformer Architectures, OCR, Intent Recognition

Web & Mobile: React.js, Next.js, Node.js, Express.js, REST APIs, WebSockets, Flutter, Google ML Kit, Firebase

Data, Cloud & DevOps: Pandas, NumPy, FAISS, ChromaDB, PostgreSQL, MongoDB, AWS, Docker, GitHub Actions, Supabase

Automation: n8n, Zapier, UiPath, Selenium, BeautifulSoup

EXPERIENCE

AI App Developer

AHHS Digital Solutions

Aug 2024 – Dec 2025

Lahore, Pakistan

- Designed and shipped AI-powered mobile and web applications end-to-end on a project basis, from concept through production release.
- Built a multi-tenant AI calling agent SaaS platform (Twilio, Deepgram, Claude, ElevenLabs) automating outbound calls with real-time AI conversation and lead qualification.
- Developed a Vision AI skincare chatbot (Flutter, Google ML Kit), training and deploying a custom TFLite model that analyzes skin conditions in real time and generates personalized care routines.
- Built a Vision AI fitness-gamification app (Flutter, Google ML Kit Pose Detection) and an autonomous lead-generation agent (Python, Selenium, FastAPI).
- Integrated cloud services (Firebase, Supabase) and CI/CD pipelines (GitHub Actions) with third-party AI/voice APIs across all client projects.

UI/UX Designer

Duseca

Nov 2023 – Mar 2024

Islamabad, Pakistan

- Designed premium, minimal interfaces with Dribbble/iOS-level aesthetics, boosting retention by 25% through refined onboarding flows.
- Built modular design systems and collaborated with developers to translate wireframes into responsive, production-ready components.
- Optimized workflows and dashboards for clarity, improving task completion speed by 30%.

Junior UI/UX Designer

E2z Tech

Apr 2022 – Dec 2022

Faisalabad, Pakistan

- Collaborated with senior designers and developers to create intuitive, user-centered designs for web and mobile applications across various client projects.
- Participated in the full UX design process, from research and wireframing to high-fidelity mockups and interactive prototyping in Figma.

PROJECTS

DispatchAI – AI Calling Agent | *Next.js, Express, Supabase, Twilio, Deepgram, Claude, ElevenLabs*

- Built a multi-tenant SaaS platform automating outbound truck-dispatch calling with real-time AI conversation, achieving under 200ms voice response latency.
- Designed the full voice pipeline (Twilio → Deepgram STT → Claude NLU → ElevenLabs TTS) with per-tenant data isolation via Supabase RLS.

Glowere – AI Skincare Chatbot | *Flutter, Google ML Kit, NLP, Firebase*

- Built a Vision AI mobile assistant that analyzes skin conditions from a phone camera in under 2 seconds and delivers personalized skincare routines.
- Trained and deployed a custom TFLite model for skin analysis, combined with an NLP chatbot for conversational follow-ups and adaptive recommendations.

FitTime – Gamified Digital Wellbeing App | *Flutter, Vision AI, Mobile, UI/UX*

- Built a Flutter app that blocks distracting apps behind a “Physical Paywall,” unlocked via real-time exercise tracked with Google ML Kit Pose Detection.

AutoLeadGen – Autonomous Lead-Generation Agent | *Python, Selenium, FastAPI, React*

- Engineered a resilience layer with ARIA / XPath / CSS fallback selectors for reliable automated data extraction across dynamic websites.
- Wrapped the automation engine in a FastAPI + React dashboard for real-time progress monitoring.

AREAS OF FOCUS

AI/ML Engineering | Generative AI & RAG Systems | NLP & Voice AI | Agentic Automation | Full-Stack & Mobile Development | Cloud Deployment
