PROFILE

AI/ML Engineer pursuing a BS in Artificial Intelligence with strong interest in building intelligent systems and solving real-world problems using data-driven approaches

EDUCATION

The University Faisalabad *Faisalabad, Pakistan*

Bachelor of Engineering in Artificial Intelligence 2024(continue)

- Among the top 5% of the batch
- Relevant coursework in [Data Base, ML, DL]

SKILLS

Technical: Python, SQL, AI Automation, Machine Learning, NLP, Liner Algebra, UI UX, SAAS, AI Agent, AI Chatbot, AI Apps, AI Webs, Flutter

CERTIFICATIONS

- Google User Experience Design – Feb'23 *(link)*

EXPERIENCE

AHHS Digital Solutions *Lahore, Pakistan*

AI/ML Engineer Nov 2025– Present

- Designed and deployed scalable machine learning models for predictive analytics, improving forecast accuracy by 15%.
- Automated data pipelines using Python and cloud services (GCP/AWS), reducing manual intervention and boosting efficiency.
- Built and integrated AI agents (chatbots, voice assistants) to streamline customer interactions and operational workflows.
- Collaborated cross-functionally with product and business teams to translate requirements into AI-driven solutions.

Duseca *Islamabad, Pakistan*

UI/UX Designer April 2023– Dec 2024

- Designed premium, minimal interfaces with Dribble/iOS-level aesthetics for SaaS and cross-platform apps.
- Conducted user research and usability testing to refine onboarding flows, boosting retention by 25%.
- Created modular design systems ensuring consistency across web and mobile platforms.
- Collaborated with developers to translate wireframes into responsive, production-ready components.
- Optimized workflows and dashboards for clarity and efficiency, improving task completion speed by 30%.

PROJECTS

1. Data Scraper

- Engineered modular Python + Selenium scraper for automated lead generation.
- Extracted structured business data (contacts, ratings, addresses) at scale.
- Reduced manual prospecting effort by 70% through automation.
- Integrated with SaaS pipelines for recruiter-ready workflows.
- Enhanced accuracy with dynamic parsing and error-handling modules.
- Enabled scalable expansion across multiple geographic regions.

2. Dispatch AI Calling Agent

- Designed AI-powered voice agent for automated dispatch and client communication.
- Implemented NLP models for natural conversation and intent recognition.
- Reduced manual call handling workload by 60%.
- Integrated with CRM systems for real-time updates.

- Improved response efficiency and customer satisfaction.
- Delivered scalable solution adaptable to multiple industries.

3. Skincare AI Chatbot

- Developed intelligent chatbot for customer support and engagement.
- Leveraged NLP + ML to handle FAQs and complex queries.
- Reduced average query resolution time by 40%.
- Enhanced customer retention through personalized responses.
- Integrated with web/app platforms for seamless user experience.
- Provided analytics dashboard to track performance and usage trends.
